Volume 53 (2002)

Subject index

'Aluminium solubility mechanisms in moderately acid Bs horizons of podzolized soils' by Gustafsson *et al.*, a re-interpretation of, 671
A and B horizons of a Haplic Alisol, organic matter in particle-size fractions from, 383
access of bacterial-feeding nematodes to food in soil: pressure plate studies to determine how moisture affects, 355
acid forest soils of the northeastern USA, cation exchange properties of, 271
Acrisol, inherent 'safety-net' of an: measuring and modelling retarded leaching of mineral nitrogen, 185
additions of organic residues, effect on concentrations of exchangeable and soil solution aluminium: influence of increases in pH and soluble salts, 481
adsorption methods, determination of surface area of soil by, 475
adsorption, effect of non-linear, on the transport behaviour of Brilliant Blue in a field soil, 231
aggregate strength and mechanical behaviour of a sandy loam soil under long-term fertilization treatments, 129
aggregates of volcanic soils, shrinkage and drainage in: a new approach combining mercury porosimetry and vacuum drying kinetics, 563
agricultural land use, influence of former, on net nitrate production in forest soils, 367
air exchange, modelling soil pore characteristics from measurements of: the long-term effects of fertilization and crop rotation, 331
air pressure, effect of reduced, on soil thermal conductivity over a wide range of water content and temperature, 599
ammonia volatilization from Vertisols, 195
anthracene, fate of, in contaminated soil: transport and biochemical transformation under unsaturated flow conditions, 71
application of cellular and immunological biosensor techniques to assess herbicide toxicity in soils, 37
arable and afforested soils in Denmark, distribution and fractionation of heavy metals in pairs of, 491
arable cropping
  fate of microbial residues in sandy soils of the South African Highveld as influenced by prolonged, 29
  influence of prolonged, on lignin compounds in sandy soils of the South African Highveld, 553

bacterial-feeding nematodes, pressure plate studies to determine how moisture affects access of, to food in soil, 355
blanket peat, laboratory experiments on drought and runoff in, 675
Book reviews, 161, 503
Brazilian Cerrado, changes in porosity and microaggregation in clayey Ferralsols of the, on clearing for pasture, 219
Brilliant Blue, effect of non-linear adsorption on the transport behaviour of, in a field soil, 231

^{14}C dating and measurements of ^{13}C, dynamics of organic matter in rock fragments in soil investigated by, 147
carbon and nitrogen in soil: soil skeleton, a forgotten pool of, 283
carbon content in illitic clay fractions, predicting, from surface area, cation exchange capacity and dithionite-extractable iron, 639
carbonate soils, pollution of due to a tailings spill, in a Mediterranean climate, 321
cation exchange capacity
  changes in, and iron reduction in intermittently waterlogged soil, 175
  modelling, in columns of disturbed and undisturbed subsoil, 645
cation exchange properties of acid forest soils of the northeastern USA, 271
cellular and immunological biosensor techniques to assess herbicide toxicity in soils, application of, 37
changes in porosity and microaggregation in clayey Ferralsols of the Brazilian Cerrado on clearing for pasture, 219
changes in soil chemistry and aggregate stability induced by fertilizer applications, burning and trash retention on a long-term sugarcane experiment in South Africa, 589
changes in the chemical composition of soil organic matter after application of compost, 299
chemical composition
  and structure of humic acids, effects of HCl–HF purification treatment on, 375
  of soil organic matter after application of compost, changes in the, 299
clay minerals in tropical soils, effect of termites on, 521
cokriging soil properties, robust estimation of the pseudo cross-variogram for, 253
compost, changes in the chemical composition of soil organic matter after application of, 299
contaminated soil, fate of anthracene in: transport and biochemical transformation under unsaturated flow conditions, 71
copper accumulated in vineyard calcareous soils, relationship with soil organic matter and iron, 663
cracking stages of saturated soils as they dry and shrink, modelling, 105
critical-state model, experiments and analysis of influence of soil strength on root growth, using a, 119

denitrification, influence of soil pH on: progress towards the understanding of this interaction over the last 50 years, 345
Denmark, distribution and fractionation of heavy metals in pairs of arable and afforested soils in, 491
depletion of soil phosphorus as assessed by several indices of phosphorus supplying power, 431
determination of surface area of soil by adsorption methods, 475
dissolved organic carbon, physicochemical factors controlling the release of, from columns of forest subsoils, 311

© 2002 Blackwell Science Ltd

distribution and fractionation of heavy metals in pairs of arable and afforested soils in Denmark, 491
drought and runoff in blanket peat, laboratory experiments on, 675
dynamics of organic matter in rock fragments in soil investigated by ^{14}C dating and measurements of ^{13}C, 147

Ecuador, nutrient storage and turnover in organic layers under tropical montane rain forest in, 15
edaphic and physiographic factors affecting the distribution of natural gamma-emitting radionuclides in the soils of the Arnás catchment in the Central Spanish Pyrenees, 629
effect of non-linear adsorption on the transport behaviour of Brilliant Blue in a field soil, 231
effect of rain on the macroporosity at the soil surface, 83
effect of reduced air pressure on soil thermal conductivity over a wide range of water content and temperature, 599
effect of reducing conditions on the solubility of phosphorus in a diverse range of European agricultural soils, 439
effect of sterilization and experimental conditions on the isotopic exchange of nickel in two contrasting soils, 655
effect of termites on clay minerals in tropical soils, 521
effects of HCl–HF purification treatment on chemical composition and structure of humic acids, 375
electrostatic potential, interpretation of humic acid coagulation and soluble soil organic matter using a calculated, 575
embryonic soils in surface cavities, rock weathering promoted by, 139
ephemeral gully erosion, spatial and temporal variations in resistance of loess-derived soils to, 449
European agricultural soils, effect of reducing conditions on the solubility of phosphorus in a diverse range of, 439
evaluation of ferrolysis in soil formation, 513
exchangeable and soil solution aluminium: increases in pH and soluble salts influence the effect that additions of organic residues have on concentrations of, 481

fate of anthracene in contaminated soil: transport and biochemical transformation under unsaturated flow conditions, 71
faulted landscape near Manaus, Brazil: lateritic and redoximorphic features in a, 203
Fe(III) (hydr)oxides and dissolved Fe(III), the role of, in heavy metal sorption on soil minerals affected by the siderophore desferrioxamine B, 45
Ferralsols of the Brazilian Cerrado: changes in porosity and microaggregation in clayey, on clearing for pasture, 219
ferrolysis in soil formation, evaluation of, 513
fertilizer applications, burning and trash retention on a long-term sugarcane experiment in South Africa: changes in soil chemistry and aggregate stability induced by, 589
field experiments and regional simulations of ion transport through unsaturated soils, 57
forest soils, influence of former agricultural land use on net nitrate production in, 367
forest subsoils, physicochemical factors controlling the release of dissolved organic carbon from columns of, 311

gamma-emitting radionuclides in the soils of the Arnás catchment in the Central Spanish Pyrenees: edaphic and physiographic factors affecting the distribution of, 629
generalized linear models in soil science, 241

Haplic Alisol, organic matter in particle-size fractions from A and B horizons of a, 383
HCl–HF purification treatment, effects of, on chemical composition and structure of humic acids, 375
heavy metal sorption on soil minerals affected by the siderophore desferrioxamine B: the role of Fe(III) (hydr)oxides and dissolved Fe(III), 45
heavy metals, distribution and fractionation of, in pairs of arable and afforested soils in Denmark, 491
herbicide toxicity in soils, application of cellular and immunological biosensor techniques to assess, 37
humic acid coagulation and soluble soil organic matter, interpretation of, using a calculated electrostatic potential, 575
humic acids, effects of HCl–HF purification treatment on chemical composition and structure of, 375
humus forms and metal pollution in soil, 529
hydraulic conductivity in a tilled soil, variation of, 619

illitic clay fractions, predicting carbon content in, from surface area, cation exchange capacity and dithionite-extractable iron, 639
impact of long-term cultivation and management history on the status and dynamics of cobalt in a savanna Alfisol in Nigeria, 169
increases in pH and soluble salts influence the effect that additions of organic residues have on concentrations of exchangeable and soil solution aluminium, 481
influence of former agricultural land use on net nitrate production in forest soils, 367
influence of prolonged arable cropping on lignin compounds in sandy soils of the South African Highveld, 553
influence of soil pH on denitrification: progress towards the understanding of this interaction over the last 50 years, 345
influence of soil strength on root growth: experiments and analysis using a critical-state model, 119
inherent 'safety-net' of an Acrisol: measuring and modelling retarded leaching of mineral nitrogen, 185
intermittently waterlogged soil: iron reduction and changes in cation exchange capacity in, 175
interpretation of humic acid coagulation and soluble soil organic matter using a calculated electrostatic potential, 575
ion transport through unsaturated soils: field experiments and regional simulations, 57
iron reduction and changes in cation exchange capacity in intermittently waterlogged soil, 175
isotopic composition of soil organic carbon on a north–south transect in western Canada, 393
isotopic exchange of nickel in two contrasting soils, effect of sterilization and experimental conditions on the, 655

laboratory experiments on drought and runoff in blanket peat, 675
lateritic and redoximorphic features in a faulted landscape near Manaus, Brazil, 203
lignin compounds, influence of prolonged arable cropping on, in sandy soils of the South African Highveld, 553
loess-derived soils, spatial and temporal variations in resistance of, to ephemeral gully erosion, 449
long-term cultivation and management history, impact of, on the status and dynamics of cobalt in a savanna Alfisol in Nigeria, 169
long-term effects of fertilization and crop rotation in modelling soil pore characteristics from measurements of air exchange, 331
long-term fertilization treatments, aggregate strength and mechanical behaviour of a sandy loam soil under, 129

macroporosity at the soil surface, effect of rain on the, 83
maize: recovery of ^{15}N-labelled fertilizer and cover crop in soil by, 541
Manaus, Brazil: lateritic and redoximorphic features in a faulted landscape near, 203
measuring and modelling retarded leaching of mineral nitrogen: inherent 'safety-net' of an Acrisol, 185
Mediterranean climate: pollution of carbonate soils due to a tailings spill in a, 321
mercury porosimetry to measure shrinkage and drainage in aggregates of volcanic soils, 563
metal pollution in soil, humus forms and, 529
microbial residues, fate of, in sandy soils of the South African Highveld as influenced by prolonged arable cropping, 29

model pool: when is a measured soil organic matter fraction equivalent to a?, 405
modelling cation exchange in columns of disturbed and undisturbed subsoil, 645
modelling cracking stages of saturated soils as they dry and shrink, 105
modelling soil pore characteristics from measurements of air exchange: the long-term effects of fertilization and crop rotation, 331
modelling the turnover of ^{15}N-labelled fertilizer and cover crop in soil and its recovery by maize, 541

^{15}N-labelled fertilizer and cover crop, modelling the turnover of, 541
nematodes, bacterial-feeding: pressure plate studies to determine how moisture affects access to food in soil, 355
net nitrate production in forest soils, influence of former agricultural land use on, 367
nickel, effect of sterilization and experimental conditions on the isotopic exchange of, in two contrasting soils, 655
Nigeria, impact of long-term cultivation and management history on the status and dynamics of cobalt in a savanna Alfisol in, 169
non-linear adsorption, effect of, on the transport behaviour of Brilliant Blue in a field soil, 231
north–eastern USA, cation exchange properties of acid forest soils of the, 271
northsouth transect in western Canada, isotopic composition of soil organic carbon on a, 393
nutrient storage and turnover in organic layers under tropical montane rain forest in Ecuador, 15

organic layers under tropical montane rain forest in Ecuador, nutrient storage and turnover in, 15
organic matter
dynamics of, in rock fragments in soil investigated by ^{14}C dating and measurements of ^{13}C, 147
in particle-size fractions from A and B horizons of a Haplic Alisol, 383

particle-size fractions from A and B horizons of a Haplic Alisol, organic matter in, 383
pasture, changes in porosity and microaggregation in clayey Ferralsols of the Brazilian Cerrado on clearing for, 219
pedotransfer functions, uncertainty analysis for, 417
pH and soluble salts, increases in, influence the effect that additions of organic residues have on concentrations of exchangeable and soil solution aluminium, 481
phosphorus supplying power, depletion of soil phosphorus as assessed by several indices of, 431
physicochemical factors controlling the release of dissolved organic carbon from columns of forest subsoils, 311
physiographic and edaphic factors affecting the distribution of natural gamma-emitting radionuclides in the soils of the Arnás catchment in the Central Spanish Pyrenees, 629
pollution of carbonate soils in a Mediterranean climate due to a tailings spill, 321
pore structure and gas diffusion, quantification of, as a function of scale, 465
porosity and microaggregation, changes in, in clayey Ferralsols of the Brazilian Cerrado on clearing for pasture, 219
predicting carbon content in illitic clay fractions from surface area, cation exchange capacity and dithionite-extractable iron, 639
preferential flow estimated from *in situ* water content measurements: rate, kinetic energy and momentum of, 607
pressure plate studies to determine how moisture affects access of bacterial-feeding nematodes to food in soil, 355
pseudo cross-variogram for cokriging soil properties, robust estimation of the, 253

quantification of pore structure and gas diffusion as a function of scale, 465

rain, effect of, on the macroporosity at the soil surface, 83
rate, kinetic energy and momentum of preferential flow estimated from *in situ* water content measurements, 607
redoximorphic and lateritic features in a faulted landscape near Manaus, Brazil, 203
reducing conditions, effect of, on the solubility of phosphorus in a diverse range of European agricultural soils, 439
Referees for 2001, 341
re-interpretation of 'Aluminium solubility mechanisms in moderately acid Bs horizons of podzolized soils' by Gustafsson *et al.*, 671
relationship between copper accumulated in vineyard calcareous soils and soil organic matter and iron, 663
repeated measurements in soil monitoring and experimentation, analysing, 1
robust estimation of the pseudo cross-variogram for cokriging soil properties, 253
rock fragments in soil, dynamics of organic matter in, investigated by ^{14}C dating and measurements of ^{13}C, 147
rock weathering promoted by embryonic soils in surface cavities, 139
role of stones in soil water retention, 95

sandy loam soil under long-term fertilization treatments, aggregate strength and mechanical behaviour of a, 129
sandy soils of the South African Highveld, fate of microbial residues in, as influenced by prolonged arable cropping, 29
saturated soils, modelling cracking stages of, as they dry and shrink, 105
savanna Alfisol in Nigeria, impact of long-term cultivation and management history on the status and dynamics of cobalt in a, 169
scale, quantification of pore structure and gas diffusion as a function of, 465
shrinkage and drainage in aggregates of volcanic soils: a new approach combining mercury porosimetry and vacuum drying kinetics, 563
soil chemistry and aggregate stability, changes in, induced by fertilizer applications, burning and trash retention on a long-term sugarcane experiment in South Africa, 589
soil formation, evaluation of ferrolysis in, 513
soil minerals affected by the siderophore desferrioxamine B, heavy metal sorption on: the role of Fe(III) (hydr)oxides and dissolved Fe(III), 45
soil monitoring and experimentation, analysing repeated measurements in, 1
soil organic carbon on a north–south transect in western Canada, isotopic composition of, 393
soil organic matter
and iron: relationship between copper accumulated in vineyard calcareous soils and, 663
changes in the chemical composition of, after application of compost, 299
soil organic matter fraction, measured: when is it equivalent to a model pool?, 405
soil pH, influence of, on denitrification: progress towards the understanding of this interaction over the last 50 years, 345
soil phosphorus, depletion of, as assessed by several indices of phosphorus supplying power, 431
soil pore characteristics, modelling, from measurements of air exchange: the long-term effects of fertilization and crop rotation, 331
soil skeleton, a forgotten pool of carbon and nitrogen in soil, 283
soil strength, influence of, on root growth: experiments and analysis using a critical-state model, 119
soil surface, effect of rain on the macroporosity at the, 83
soil thermal conductivity over a wide range of water content and temperature, effect of reduced air pressure on, 599
soil water retention, role of stones in, 95
solubility of phosphorus in a diverse range of European agricultural soils, effect of reducing conditions on the, 439
South Africa, changes in soil chemistry and aggregate stability induced by fertilizer applications, burning and trash retention on a long-term sugarcane experiment in, 589

South African Highveld
fate of microbial residues in sandy soils of the, as influenced by prolonged arable cropping, 29
influence of prolonged arable cropping on lignin compounds in sandy soils of the, 553
Spanish Pyrenees, edaphic and physiographic factors affecting the distribution of natural gamma-emitting radionuclides in the soils of the Arnás catchment in the, 629
spatial and temporal variations in resistance of loess-derived soils to ephemeral gully erosion, 449
status and dynamics of cobalt in a savanna Alfisol in Nigeria, impact of long-term cultivation and management history on the, 169
stones, role of, in soil water retention, 95
subsoil, modelling cation exchange in columns of disturbed and undisturbed, 645
sugarcane experiment in South Africa, changes in soil chemistry and aggregate stability induced by fertilizer applications, burning and trash retention, 589
surface area of soil, determination of, by adsorption methods, 475
surface cavities, rock weathering promoted by embryonic soils in, 139

tailings spill, pollution of carbonate soils in a Mediterranean climate due to a, 321
termites on clay minerals in tropical soils, effect of, 521
tilled soil, variation of hydraulic conductivity in a, 619
transport and biochemical transformation of anthracene in contaminated soil, under unsaturated flow conditions, 71
transport behaviour of Brilliant Blue in a field soil, effect of non-linear adsorption on the, 231
tropical montane rain forest in Ecuador, nutrient storage and turnover in organic layers under, 15
tropical soils, effect of termites on clay minerals in: fungus-growing termites as weathering agents, 521

uncertainty analysis for pedotransfer functions, 417
unsaturated flow conditions, transport and biochemical transformation of anthracene in contaminated soil under, 71
unsaturated soils, ion transport through: field experiments and regional simulations, 57

vacuum drying kinetics to measure shrinkage and drainage in aggregates of volcanic soils, 563
variation of hydraulic conductivity in a tilled soil, 619
Vertisols, ammonia volatilization from, 195
vineyard calcareous soils and soil organic matter and iron, relationship between copper accumulated in, 663
volatilization of ammonia from Vertisols, 195
volcanic soils, shrinkage and drainage in aggregates of: a new approach combining mercury porosimetry and vacuum drying kinetics, 563

weathering agents, fungus-growing termites as, in tropical soils: 521
weathering of rock promoted by embryonic soils in surface cavities, 139
western Canada, isotopic composition of soil organic carbon on a north–south transect in, 393
